connorwjpayne@gmail.com | 519-615-4832 | [LinkedIn](#) | [GIS Portfolio](#)

Skills

GIS & Mapping: ArcGIS Pro, ArcGIS Online, ArcGIS Field Maps, ArcCatalog, AutoCAD (basic exposure)

Database & Analysis: SQL queries, reporting, data selection, QA/QC, spatial data maintenance

Programming & Development: Visual Studio 2022, C#, SQL, Python, JavaScript, HTML/CSS

Productivity & Communication: Microsoft 365, documentation, reporting, collaboration; fluent in English and French

Education & Certifications

Certification in Geographic Information Systems

Sept. 2025 – Apr. 2026

Fanshawe College, London, ON

- Completed a 1-year postgraduate GIS certification and co-op program; GPA: 3.6.

Bachelor of Arts in Geography

Sept. 2020 – Apr. 2024

Western University, London, ON

- Major in Physical Geography with coursework in Introductory GIS, Remote Sensing, Transport Geography, GIS I/II, Urban Development, Geomorphology, Paleolimnology, Statistics, and River Morphology.

Professional Experience

GIS Student – Asset & Quality Management

May 2026 – Present

Municipality of Chatham-Kent

- Conduct field data collection for municipal assets using GPS-enabled mobile GIS tools to capture accurate spatial information in field environments.
- Translate field-collected infrastructure and asset information into geospatial datasets and maps using ArcGIS and ArcGIS Field Maps.
- Support spatial data maintenance, editing, and updates to ensure consistency between field observations and GIS databases.
- Assist with QA/QC processes to validate geospatial data accuracy and improve municipal asset information reliability.
- Collaborate with staff to support mapping deliverables, documentation, and spatial reporting for municipal operations.

Project Experience

Road Asset Data Quality & Inspection Workflow

Jan. 2026 – Mar. 2026

- Conducted a municipal road asset data assessment using centerline roads open datasets in ArcGIS Pro.
- Designed an asset-oriented GIS schema to evaluate missing infrastructure attributes relevant to municipal asset management.
- Performed spatial analysis and QA/QC to identify data gaps and prioritize inspection needs.
- Integrated traffic volume datasets (AADT) to support infrastructure prioritization decisions.
- Designed and published a Survey123 field inspection workflow to support future mobile data collection.

Jan. 2026 – Apr. 2026

Pollinator & Invasive Species Web App

- Collaborated with a team to develop an interactive geospatial web application visualizing ecological datasets across London, Ontario.
- Used SQL, ArcGIS Pro, and Visual Studio to manage, analyze, and visualize spatial data.
- Integrated Google Maps API to support interactive mapping and user-friendly data visualization.
- Performed spatial analyses such as buffers, overlays, and hotspots to identify key biodiversity areas and support data-driven insights.

Dec. 2025

Emergency Evacuation Modeling

- Developed a GIS-based evacuation model simulating a hazardous rail incident scenario.
- Applied buffer and proximity analysis to define evacuation and exclusion zones.
- Integrated transit network data to identify evacuation and accessibility routes.
- Conducted population exposure analysis using census data.
- Produced stakeholder-ready maps to support emergency planning and communication.

Feb. 2024

Vehicle Collision Hotspot Analysis – Downtown Toronto, ON

- Analyzed fatal and non-fatal collision data from 2006–2021 to identify spatial and temporal crash hotspots.
- Performed temporal analysis to detect time-of-day risk patterns.
- Applied spatial statistics and visualization techniques using ArcGIS Pro.
- Produced thematic maps to support transportation safety insight.
